StrataView™

THE CHOICE IS CLEAR

StrataView™

StrataView™ combines the design appeal of panoramic glass with the added safety of toughened glass in balustrades and fencing.

This toughened glass remains strong in outside conditions, making it ideal for commercial and residential balconies, walkways, fences and outdoor partitions. If **StrataView™** does break, however, its interlayer helps the unit keep its shape, offering a temporary structural safeguard until repair and replacement is possible. As it's suited most for outdoor applications, it provides great clarity to leave views unobstructed and UV resistance to offer protection against the sun's radiation.

StrataView™ can be manufactured in a variety of shapes and sizes, and is a strong, safe, modern design choice for all kinds of spaces.

Protect views and people with **StrataView™** safety glass, specially designed for aesthetically pleasing balustrades and fencing.

Ultra Durable

StrataView™ is toughened and shatter resistant, with a tear resistant interlayer that maintains structural integrity even when broken.

UV Resistant

StrataView™ offers a good level of UV protection, helping to block the sun's radiation effects on people and slowing the rate of paint and furniture fading.

Crystal Clear

StrataView™ delivers exceptional visual clarity and light transmission, ensuring spectacular views remain spectacular.
