SanctaShield™ Plus

THE CHOICE IS CLEAR

SanctaShield™ Plus

SanctaShield™ Plus is specially designed to fit in with modern home living, improving comfort and energy efficiency alongside high levels of natural sunlight to fill your living spaces.

These insulated glass units help to block the transfer of heat from outside to inside and vice versa and are made even more effective with the addition of a warm edge spacer. This means that **SanctaShield™ Plus** can reduce the load on active heating and cooling systems in all kinds of weather, while still keeping your home a bright and welcoming space. With a range of thicknesses to choose from to suit a variety of window and door frames, its ideal applications are in external facing residential windows, doors and skylights to protect your interior from the Australian climate.

The warm edge spacer makes **SanctaShield™ Plus** insulated glass units the ultimate in bright, comfortable living for year round comfort.

Liveability is at the forefront with **SanctaShield™ Plus** insulated glass units with a warm edge spacer, designed to improve energy efficiency of your home while allowing high levels of light transmission.

Ultimate Energy Efficiency

SanctaShield™ Plus warm edge spacer is the most effective at reducing the burden on your active heating and cooling systems to maintain home temperatures and reduce energy costs significantly.

Crystal Clear

SanctaShield™ Plus allows high levels of light transmission through, ensuring views stay spectacular and interiors are bathed in natural sunlight.

Fully Customisable

SanctaShield™ Plus can be used with other products in our range to take on outstanding aesthetic, strength and noise reduction properties.
