

GLASS MARKET

StrataSwitch™

THE CHOICE IS CLEAR

StrataSwitch™

StrataSwitch™ is an innovative glass unit that changes its appearance from transparent to opaque at the flick of a switch.

This remarkable feat is achieved through a clever interlayer liquid crystal film which normally diffuses light and makes the glass opaque. When charged with an electrical current however, the liquid crystals align and allow light to pass straight through. With an installed switch with a power source to activate it, you can open up the space or make it private in an instant.

StrataSwitch™ is an excellent choice for bathrooms and has great applications for business meeting rooms, where it can serve as both a partition and an on-demand projection screen.

StrataSwitch™ is revolutionary switchable privacy glass which shifts from clear glass to completely opaque in an instant. With no curtains or screens required, you barely lift a finger to have total privacy right away.

Controlled Privacy

StrataSwitch™ opens up and sections off spaces for privacy with one switch. In the event of a power failure, the default unpowered state is opaque so there are no sudden surprises.

High Levels of Light Transmission

The innovative film that makes **StrataSwitch™** possible diffuses light without blocking it, ensuring the room is still filled with soft natural light.

Decor Friendly

StrataSwitch™ is incredibly suited to your modern design aesthetic, doing away with the need for curtains and blinds which can be difficult to clean.
