SanctaGuard™ Ultra

THE CHOICE IS CLEAR

SanctaGuard™ Ultra

SanctaGuard™ Ultra is all about high levels. High levels of light transmission, high levels of solar heat control, designed for high level buildings.

For medium to high rise facades that see a lot of the Australian sun, **SanctaGuard™ Ultra** is ideal for external facades and curtain walls. It offers low U-values to help maintain comfortable internal temperatures while allowing visible sunlight to filter through and keep the interior bright. These properties also allow it to be used in a wide range of contemporary design choices from skylights to statement pieces.

Keep the inside bright and comfortable and the outside sleek and sophisticated with **SanctaGuard™ Ultra** high performance insulated glass units for high rise designs.

Touch the sky in comfort with **SanctaGuard™ Ultra** high performance insulated glass units providing exceptional light transmission alongside low U-values for better solar control.

High Light Transmission

SanctaGuard™ Ultra allows natural light to filter through the room, keeping it bright while keeping temperatures under control. This creates a perfect calm mood in any space.

Fully Customisable

SanctaGuard™ Ultra can be used with other products in our range for added energy efficiency, strength and noise reduction properties.

Energy Efficient

The high light transmission maximises passive solar heat gain in winter and in colder climates, reducing the need for active heating.
