StrataMirage™

THE CHOICE IS CLEAR

StrataMirage™

StrataMirage™ is our safest option for stunning, highly reflective mirrored glass made tough and safe enough for high traffic applications.

This laminated Grade-A safety glass is more resistant to damage and, in the event of breakage, holds potentially dangerous glass shards in place to reduce the chance of injury. Combined with its crystal clear, highly reflective silvered surface, it's the first choice for spaces where impacts may happen such as gyms, studios, fitting rooms, elevators and bathrooms.

As a stunning yet functional and highly durable addition to commercial and even residential spaces, **StrataMirage™** is made with the utmost safety of customers and visitors in mind.

StrataMirage™ laminated mirror glass combines the appeal of a bright and spacious mirror with the durability of laminated glass to withstand frequent contact with people.

Extra Durable

StrataMirage's™ laminated construction ensures long-lasting durability, designed to hold up to the wear and tear of everyday life.

High Reflectivity

StrataMirage™ delivers exceptional visual clarity and light reflection, letting light fill the room and expanding its sense of space.

Safe Even When Broken

Should **StrataMirage™** be damaged, the interlayer holds glass together so that dangerous glass shards remain in place, reducing the risk of injury.
