Mirage™ Epoxy

THE CHOICE IS CLEAR

Mirage™ Epoxy

Mirage™ Epoxy mirrors provide exceptional light reflectivity for brightening and visually expanding rooms with increased protection against everyday interaction.

Its epoxy formula is specially designed to be durable against scratches, stains and moisture, making it ideal for areas where people are likely to come into contact with it such as commercial spaces, homes and elevators. **Mirage™ Epoxy's** epoxy lends itself well to customisations such as cutting, drilling bevels and edge work as needed.

As it contains no copper, **Mirage™ Epoxy** is also more environmentally friendly than regular mirror glass while still maintaining excellent levels of reflectivity.

Mirage™ Epoxy is a highly reflective epoxy mirror made tough for areas with high traffic and close contact with people. Its epoxy formula offers increased protection against scratches and stains.

Extra Durable

Mirage™ Epoxy's epoxy formulation means it holds up well against the wear and tear of everyday life.

Customisable

Mirage™ Epoxy can be worked more effectively than regular mirror glass, opening up options for cutting into shapes, drilling, bevelling, edge working and even sandblasting graphics into its surface.

Environmentally Friendly

With zero copper in its production, **Mirage™ Epoxy** is more environmentally friendly compared to regular mirror glass.
