InspiraSatin™

THE CHOICE IS CLEAR

InspiraSatin™

InspiraSatin™ diffuses light evenly throughout the panel with an etched matt satin finish that produces a misty, clouded effect viewing from one side to the other.

With a range of applications, InspiraSatin™ is ideal for interior spaces where privacy may be a concern such as bathrooms and business meeting rooms. But privacy doesn't need to feel closed off, as the allowance for high natural light transmission keeps these places feeling natural, lively and warm. Its aesthetic appeal is enhanced by the calm, misty effect and it has further applications as a simple and effective decorative choice on external spaces, splashbacks and balustrades.

For everything from partitions to doors to windows, InspiraSatin™ delivers on a space filled with comforting light while maintaining the privacy you need.

Let natural light in while maintaining privacy with InspiraSatin's™ etched satin finish. Its light diffusion allows for high levels of light transmission while obscuring vision for an aesthetically pleasing way of preserving private spaces.

Maintains Privacy

InspiraSatin™ diffuses light passing through the panel, scattering the view into an appealing misted or frosted effect.

High Levels of Light Transmission

Though it diffuses the light, InspiraSatin™ does not reduce the amount of light passing through, meaning spaces stay just as bright and filled with natural light.

Easy to Clean

While the frosted effect is achieved through etching, InspiraSatin's™ surface is not rough. This allows for cleaning that's as quick and easy as any other glass product.
